

Forest fires in Texas

Nature continues to show mankind who on Earth the owner sending us earthquakes, floods, tsunamis and tornadoes in various parts of the world. Today we tell about the devastating fires raging in America. According to the forest Service of Texas March 2011 was the driest month in the history of this state. It caused severe drought and forest fires destroyed hundreds of homes and more than four thousand square kilometres of forests over the last two weeks. In fighting fires employs about 2 000 people from all over the state and spent \$ 2 million a day. 1. Photo by Alberto Tomas Halpern | AP 2. Fire. Start to work Texas April 18, 2011.
